Confidential	Yes	<input type="checkbox"/>	No	<input checked="" type="checkbox"/>	Items are only confidential if it is in the public interest for them to be so
Assurance Level Agreed by Responsible Director	Good <input type="checkbox"/> X	Adequate <input type="checkbox"/>	Limited <input type="checkbox"/>	Unsatisfactory <input type="checkbox"/>	

The Committee is asked to:

Note the revised quality dashboard. Discuss how the information can be used to inform primary care decisions relating to quality – patient experience, patient safety and effectiveness.

The Committee is requested to note the information on the dashboard is refreshed twice a year and is ‘at a point in time’.

Summary of purpose and scope of report

The dashboard summarises key information that is either available in the public domain or available from NHS England returns from primary care and is intended to give an overview of GP primary care quality through the available information which acts as a benchmarking tool. It is intended that the information will enable the primary care committee to focus on and prioritise key concerns to support general practice quality improvements.

The primary care dashboard is not a performance tool. The primary care team are in the

Paper: 9

process of developing a monitoring framework for contract assurance this will help to identify practices in need of support. It is recognised that there is an overlap between the criteria used for the quality dashboard and performance assurance therefore the quality team will work with the primary care team to prevent or minimise duplication.

Quality leads already participate in and lead assurance monitoring visits to GP practices. This tool when triangulated with other available information will enable prioritisation of support and proactive scheduling of practice visits.

Quality & Safety/ Patient Engagement/ Impact on patient services:

The outcome of working with the dashboard has the capacity to impact on the quality and safety of patients at individual General Practice primary care level as well as at the wider level in primary care federations and hubs.

Finance, resources and QIPP

None identified

Equality / Human Rights / Privacy impact analysis

Not undertaken – none identified

Risk	Mitigating actions
<p>Issues identified on the dashboard are not managed.</p> <p>Areas of individual practice and performance are highlighted</p>	<p>Primary Care Commissioning Committee (PCCC) is able to identify and support practices and tailor resources to ensure that areas highlighted are managed.</p> <p>Issues managed with NHSE as part of PCCC with referral on to NHSE medical leads as appropriate. Focus maintained on quality not performance.</p>
