

North West London Primary Care Co-Commissioning CCG ballot arrangements

Member practices will be asked two questions:

1. Should Hammersmith and Fulham CCG enter into primary care joint co-commissioning arrangements with NHS England?

2. If yes, do you approve of the proposed amendments to the constitution set out in Annex A?

Notes:

- The formal co-commissioning relationship is between each CCG and NHS England.
- The basis of primary care co-commissioning will be the Establishment Agreement/Terms of Reference and conflict of interest addendum voted on by the governing bodies and the constitutional change, which requires membership support.
- Member practices will have received all relevant information prior to the vote. This includes the terms of reference for their CCG's joint committee with NHS England, the conflict of interest addendum, and constitutional amendment, as well as an information pack and FAQ document.
