

North West London Primary Care Co-commissioning Joint Committees

Declarations of interest register

National guidance recognises real and potential conflicts of interest as significant risks for CCGs undertaking primary care co-commissioning. All of the North West London CCGs have updated their conflict of interest policies in response to this. Additionally, each of the joint committees comprises a lay/executive majority.

To provide maximum transparency, the secretariat has aggregated voting members' declared conflicts and supplemented these where necessary. These are set out in the supporting document. Further declarations relevant to agenda items will be made at the beginning of each meeting.

The complete register will be posted alongside the information about primary care co-commissioning on each CCG's website and updated in line with the CCGs' own registers.
